

List of Prostheses and Specialised Equipment

This List of Prostheses and Specialised Equipment sets out the prostheses and specialised equipment types and associated maximums covered by your policy.* For a prosthesis or specialised equipment to be covered as part of an eligible surgical treatment it must be listed below. The maximums listed are inclusive of GST and all costs associated with the item, for example bone cement or prosthesis handling fees.

Please note that for the SuperCare policy there are separate prostheses and specialised equipment maximums outlined in the Coverage Tables in the policy document which will apply. For the UltraCare policy the maximums below do not apply.

*Wellbeing Starter does not provide cover for surgical treatment or other healthcare services for gynaecology, urology and orthopaedics (referred to in the policy document as restricted specialties), unless they are directly required for the treatment of cancer. This means that the prosthesis and specialised equipment listed that relates to a restricted specialty will not be covered unless it is directly required for the treatment of cancer.
